

RYAKALA BHUVANESHWARI

📞 8297676438 Email LinkedIn GitHub LeetCode (160+)

Profile Summary

Full-stack and AI Engineer with experience in building scalable web applications, RAG systems, and ML-based pipelines. Strong in React.js, Node.js, FastAPI, and Python. Focused on backend systems, AI engineering, and production-grade software development with strong DSA foundation.

Education

Rajiv Gandhi University of Knowledge Technologies, Basar <i>B.Tech in Computer Science and Engineering</i>	2023 – 2027 <i>CGPA: 9.4</i>
Rajiv Gandhi University of Knowledge Technologies, Basar <i>Pre-University Course</i>	2021 – 2023 <i>CGPA: 9.81</i>
Victory High School, Chandur <i>Secondary School Certificate</i>	2021 <i>CGPA: 10</i>

Projects

Smart Doc Chunker — RAG Visualization System

FastAPI, React, Python, Docker

- Built full-stack Retrieval-Augmented Generation (RAG) system with chunking, embedding, retrieval, and answer visualization pipeline.
- Implemented recursive and sliding-window chunking with configurable overlap for document segmentation.
- Developed stateless FastAPI backend with cosine similarity-based retrieval engine.
- Created React UI with real-time pipeline visualization and retrieval score heatmaps.

AI Dataset Cleaning & Validation Pipeline

Python, Pandas, FastAPI, PyTest, GitHub Actions

- Built automated data validation pipeline with schema checks, anomaly detection, and data quality scoring.
- Implemented regex-based cleaning, drift detection, and structured dataset profiling system.
- Achieved 100% test coverage using PyTest and integrated CI/CD using GitHub Actions.
- Generated automated HTML/PDF reports with visualization dashboards for dataset insights.

Taskflow — Multi-Tenant SaaS Platform

React.js, Node.js, Express.js, MongoDB, Redis, JWT

- Built multi-tenant SaaS platform with organization-based workspace hierarchy (Org → Projects → Tasks).
- Implemented JWT authentication with refresh tokens and role-based access control.
- Developed scalable REST APIs with Redis caching for performance optimization.

MediLocal — Healthcare Platform

React.js, Node.js, Flask, Python, MongoDB

- Built healthcare platform for real-time pharmacy discovery using geospatial distance algorithms.
- Designed hybrid architecture combining Node.js backend with Flask ML service.
- Implemented ML-based symptom classification using Decision Tree model.

Experience

Infosys Springboard Virtual Internship

AI/ML Intern

2025

Remote

- Built supervised learning models for image classification using deep learning techniques.
- Developed full ML pipeline including preprocessing, training, evaluation, and tuning.

Technical Skills

- **Frontend:** React.js, HTML, CSS, JavaScript (ES6)
- **Backend:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** MongoDB, MySQL
- **Languages:** Java, Python, C, JavaScript
- **Core:** Data Structures, Algorithms, OOP, DBMS, System Design Basics
- **Tools:** Git, GitHub, Docker, VS Code

Achievements

- Solved 160+ Data Structures and Algorithms problems on LeetCode.
- Winner – Smart India Hackathon (University Level, 2025).
- State Rank 1 – Chekumuki Science Talent Test.
